

KI

**(Potassium Iodide)
Pills**

**Available to
Residents of Chatham**

KI, a “thyroid blocking agent”, is a non-prescription medicine that when used properly can prevent the uptake of radioactive iodine by the thyroid gland that may be released to the environment during a nuclear emergency.

Residents may pick up a free supply of pills for household members at:

**Chatham Health Department
261 George Ryder Rd.
M-F 9:00a.m. to 3:00p.m**

Call (508) 945-5165 for more info.
