To: Old Queen Anne Road Property Owners
From: Thomas Temple, Public Works Director
Date: August 27, 2021

Work to install a new sidewalk, curbing and ADA compliant handicap ramps along Old Queen Anne Road (between Main Street and Stepping Stone Road) shall begin shortly after Columbus Day.

The work will begin on the east side of Old Queen Anne Road at Main Street/ Rte. 28 and continue northerly past Spinnaker Lane to Stepping Stone Road.

The contractor, Lawrence Lynch Corp., intends to work as efficiently as possible while providing residents in the work zone access to properties with as little inconvenience as possible. The work is expected to take approximately 4-weeks, and the contractor anticipates completing all work on or before November 24, 2021.

The Department anticipates one lane closure throughout construction, between 7:00 AM and 4:00 PM each day. The southbound traffic lane heading towards Main Street/Rte. 28 will remain open. There will be a few occasions when a full road closure and detour for the project limit will be required (i.e. associated with the raising of all frames, grates, covers gate boxes etc. and the placement of the 1 ½-inch top course of Hot Mix Asphalt on Old Queen Anne Road).

The exact date this work will commence is dependent upon receipt of granite curbing materials by the contractor. Property owners will receive further notification from the contractor when the schedule is in place and notice will be posted on the Town's website – www.chatham-ma.gov.

If your property is occupied by a tenant, please forward this information to them.

If you have any questions regarding the foregoing, please contact me at ttemple@chatham-ma.gov or through the Highway Division at 508-945-5155.
